## What next?

Please tear off and post the order form and pricing structure to REFCOM, Old Mansion House, Eamont Bridge, Penrith, CA10 2BX or fax to 01768 860 401.

Track it down at [www.hvca.org.uk/publications](http://www.hvca.org.uk/publications) or call 01768 860 405 now.

# **designed** to make contractors lives **easier** in the lead-up to F-Gas and beyond

“ the standards set out by the REFCOM scheme,  
coupled with REFCOM 2007 software and the ACRIB  
operative register, provide the best scheme available for  
compliance with The F-Gas Regulations ”

future-proof  
your business

track refrigerant  
gases responsibly

use **REFCOM 2007**

# REFCOM 2007

The new generation REFCOM Refrigerant Tracking Database

## **REFCOM – the new generation has arrived**

REFCOM – the register of companies competent to handle refrigerants in the UK – presents REFCOM 2007, the essential software for **any business** involved in refrigerant handling.

The next phase of the REFCOM Refrigerant Tracking Database, **REFCOM 2007** has been upgraded to provide an even easier and more accurate means of recording refrigerant movement between supplier, cylinder and plant – from commissioning and charging, through to subsequent recovery and final disposal.

It's the most effective and easy-to-use package available and it's produced specifically for the industry, so whether you're installing, commissioning or maintaining refrigeration or air conditioning systems, REFCOM 2007 is for you.

**Track your copy down at  
[www.hvca.org.uk/publications](http://www.hvca.org.uk/publications)  
or call 01768 860 405**

## Key for compliance...

The new F-Gas Regulations demand that an accurate audit trail of refrigerant transactions must be maintained for all equipment with a charge of more than 3kg.

REFCOM 2007 is the simple way of recording every refrigerant transaction quickly and easily, summarising them for your convenience. Based on standards already aligned with the F-Gas Regulations and recognised by ACRIB, REFCOM 2007 ensures companies remain ahead of the game and, most importantly, fully compliant with industry regulation.

REFCOM 2007 also covers related legislation, including the Hazardous Waste Regulations 2005.

# Key Benefits

■ Multi-user license ideal for larger companies

■ Automatic backup saves entries as you work

■ Regular updates ensure optimum performance

■ Improved functionality streamlines user work-flow

■ Software specifications written by refrigeration engineers

■ Subscription service ensures ongoing compliance with crucial legislation

■ Promotes recognisable high standards aligned with REFCOM's model scheme

■ Boosts professional reputation with customers, clients and specifiers

■ Generates immediate savings by tracking costly refrigerant cylinder deposits and penalties

■ Automatic upgrade and data transfer from version 1

■ Slashes time spent on lengthy manual logging procedures

■ Improves customer service through close monitoring and instant reporting.

## Subscription

REFCOM's low-cost subscription service is recommended to get the very best from the Refrigerant Tracking Database. For a nominal biannual charge commencing six months after the date of purchase, REFCOM subscribers benefit from automatic **free software upgrades** as the package grows to meet new user requirements, **a free newsletter containing technical updates on evolving best practice and guidance on emerging legislation, and free access to REFCOM'S online help service.**
